

Mona differential shaft

superior performance

Mona Differential Shaft :

Mona differential shaft is basically a rewinder shaft of slitting machine can give consistent winding tension irrespective of length diameter and gauge variation.

Uses : Multiple core on one shaft can be mounted.

Advantages:

- Reduces job set up time.
- No need to open shaft inserting spacers as per coil width.
- It gives uniform tension even of a higher speed irrespective of gauge variation.
- Loading & Unloading time is very less.
- Avoid core dust.

Available Sizes: 76mm & 152mm.
